INDIVIDUAL PROGRAMMERS

MEMOPROG, Ref. 7392-1

Just insert this cassette programmer into the receptacle of the appliance.

Can also be fitted to the electric storage heaters, using the optional receptacle ref. 8290-5.

Colour : light beige (add AAES to the reference) or black (add AACN).

Memoprogram offers :

- 7 pre-set programmes
- one programme that can be customised to suit a particular routine
- programme step : one hour
- programmable positions : comfort and economy
- LCD screen displaying : time, day, heating position, day programme.

Any appliance fitted with Memoprogram can drive up to 20 appliances through the pilot wire.

Instructions on the unit

easy use

individual

permanent display

ECO 6, ref. 7392

- For the Arkos (radiant panel) and Axane (convector heater) models only.
- 5 pre-set programmes.
- Programmable positions : comfort and economy.
- Can drive other appliances through the pilot wire.

Override facilities :

It possible to disconnect from the programming system to cater for particular needs (for instance : temporary need for higher temperature).

Push the heater position selector button from "Prog" to the required position : "comfort" or "economy" or "frost protection".

Also, Memoprogram offers a frost protection override facility.
